# Objective

- Streamline KYC, progress tracking, and monthly reporting for startups.
- Enable EIR and Grants management from submission to fund distribution.

# Key Features

- KYC for startups (company details, address, contact).
- Track startup progress and reports.
- Push messages and notifications.
- EIR and Grants management system.

# Features

StartHub is a platform to streamline the collection of KYC (Know Your Customer) information from startups, track their progress, manage monthly report submissions, and handle EIR (Entrepreneur-in-Residence) and grants applications. Built using the MERN stack, this web app provides a centralized interface for both startups and administrators.

01.

## KYC & Progress Tracking:

- Collect and store startup information.
- Update and track startup progress over time.

02.

## Monthly Reports:

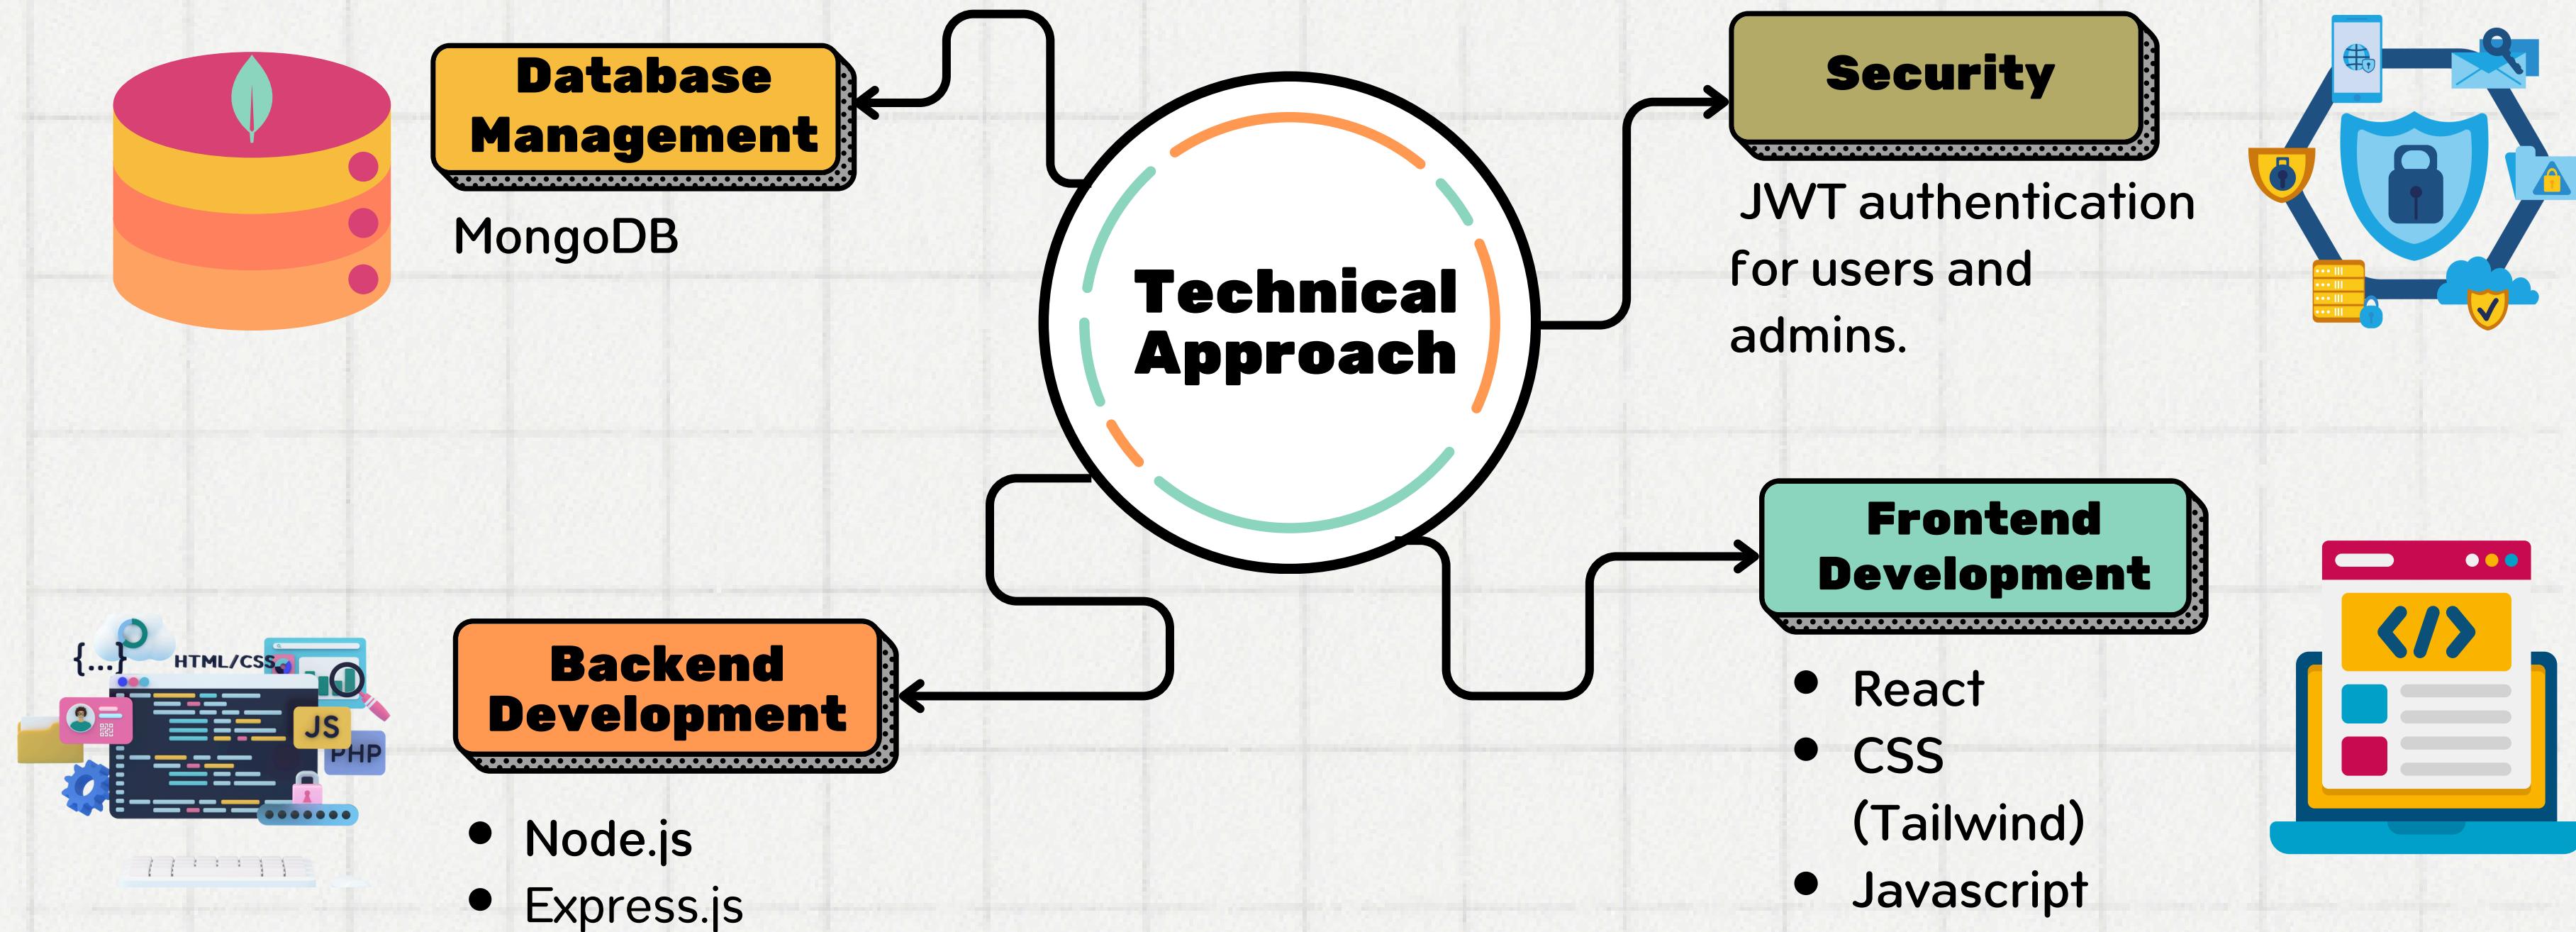

- Collect and view monthly startup performance reports.
- Easy submission of reports (files, text).

03.

## EIR and Grants Management:

- Collect and manage applications, fund distribution, and progress tracking.

# Technical Architecture

# Usage

## Admin Functions

- View and manage startup KYC information.
- Track startup progress.
- Send push messages to startups.
- Manage EIR and Grants schemes.

## Startup Functions:

- Submit KYC details.
- Update progress.
- Submit monthly reports.
- View messages from the admin.

**Thank you  
very much!**
